

To whom it may concern:

Devin Henderson worked his magic on us as the closing speaker for our annual meeting. The Missouri WIC Association is made up of local public health providers from across the state that provide nutritious food and education to women, infants and children.

These big-hearted caregivers give their all to those they serve each day and **Devin's message was enlightening, creative and enjoyed by all.** He did an excellent job getting the audience involved and up on the stage while bringing us a message about how to be more successful with the relationships in our life. The principals he shared are just as applicable to our participants as they are to our co-workers, friends and families. Attendees found him to be very uplifting and they left our meeting on a positive note.

After our meeting one of our planning committee members commented, "I was afraid he may be corny being a magician and all, but he was funny. I liked the way his message came across through his magic. He was personable as well." We found Devin to be very genuine and easy to work with. **He was very entertaining while bringing home, in a practical manner, how to apply universal interpersonal skills.**

We thought he was FANTASTIC!!! We would highly recommend him as he kept us all laughing and focused.

Sincerely,

Jim Wheaton, President
Missouri WIC Association
